## No-Till Drill Rental

### General Guidelines

Lessee (Customer) must complete a RENTAL AGREEMENT form and submit along with a \$50.00 deposit to the district before being put on the schedule and transporting equipment.

Please do not send cash.

Rental equipment is scheduled on a first come first served basis.

Lessee is responsible for transporting the equipment to and from the District office unless other arrangements have been made. The District will deliver the drill upon first time use.

A heavy duty (3/4 ton or larger) truck is required to transport the equipment. Safety chains must be fastened to the truck's frame or hitch. Proper insurance coverage must be held.

No interstate-hauling, maximum on road speed is 25 MPH.

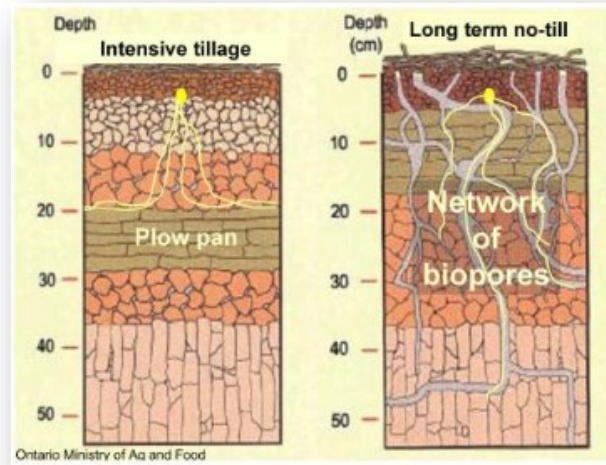

A 50 horsepower or larger tractor is required for operating the Truax. One set of hydraulic remotes is needed to operation the drill, two sets are ideal.

The Lessee will store the equipment in a covered building when not in use.

The drill is not to be used to apply fertilizer.

The Lessee is responsible for cleaning the seeder after use.

## Why No-Till?

- Build soil health and soil structure
- Reduce soil erosion
- Increase infiltration
- When crop residue remains on the soil surface it protects the soil from most of the damages caused by wind and rain
- Helps build organic matter and feed the soils' biological organisms

## Truax FLEXII-812RD

- ◇ 8ft planting width, 9ft overall
- ◇ Three separate seed boxes (Cool season, small grain and fluffy seed)
- ◇ 12 double disc furrow openers and depth bands
- ◇ Rear wheel drive, 12-14" ground clearance when towing
- ◇ Equipped with a front castor wheel

We thank you for your participation  
in agricultural conservation!
